

Need strong transitive verbs? Here are 250 eminently suitable actions or tactics for verbalizing characters. Remember:

- The **ACTION** is something the character does every moment of a story. It expresses their essential nature, not something they *want to do* or *used to do*, but something they are always doing to achieve their story goal. A character's Action arises from their Void.
- **TACTICS** are synonyms of the action (and synonyms *of* synonyms), which reveal the character's re-action specific to a situation the story unfolds to achieve their scene goal. For character to cohere, tactics must cohere. Tactics express a character's Grace.
